Exam Topic Breakdown

Exam Topic	Number of Questions
Topic 3 : Litware inc	3
Topic 4 : Misc. Questions	3
Topic 1 : Contoso, Ltd	3
Topic 2 : Fabrikam, Inc	1
TOTAL	10

Topic 3, Litware inc

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Overview

General Overview

Litware, Inc. is a consulting company that has a main office in Montreal and a branch office in Seattle.

Litware collaborates with a third-party company named ADatum Corporation.

Environment

On-Premises Environment

The network of Litware contains an Active Directory domain named litware.com. The domain contains three organizational units (OUs) named LitwareAdmins, Montreal Users, and Seattle Users and the users shown in the following table.

Name	OU
Admin1	LitwareAdmins
Admin2	LitwareAdmins
Admin3	LitwareAdmins
Admin4	LitwareAdmins

The domain contains 2,000 Windows 10 Pro devices and 100 servers that run Windows Server 2019.

Cloud environment

Litware has a pilot Microsoft 365 subscription that includes Microsoft Office 365 Enterprise E3 licenses and Azure Active Directory Premium Plan 2 licenses.

The subscription contains a verified DNS domain named litware.com.

Azure AD Connect is installed and has the following configurations:

- ➔ Password hash synchronization is enabled.
- ➔ Synchronization is enabled for the LitwareAdmins OU only.

Users are assigned the roles shown in the following table.

Name	Role
Admin1	Global Administrator
Admin2	Helpdesk admin
Admin3	Security admin
Admin4	User Administrator

Self-service password reset (SSPR) is enabled.

The Azure Active Directory (Azure AD) tenant has Security defaults enabled.

Requirements

Planned Changes

Litware identifies the following issues:

- ➔ Admin1 cannot create conditional access policies.
- ➔ Admin4 receives an error when attempting to use SSPR.

- Users access new Office 365 service and feature updates before the updates are reviewed by Admin2.

Technical Requirements

Litware plans to implement the following changes:

- Implement Microsoft Intune.
- Implement Microsoft Teams.
- Implement Microsoft Defender for Office 365.
- Ensure that users can install Office 365 apps on their device.
- Convert all the Windows 10 Pro devices to Windows 10 Enterprise E5.
- Configure Azure AD Connect to sync the Montreal Users OU and the Seattle Users OU.

Question #:1 - (Exam Topic 3)

You need to configure just in time access to meet the technical requirements.

What should you use?

- A. access reviews
- B. entitlement management
- C. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- D. Azure Active Directory (Azure AD) Identity Protection

Answer: C

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure>

Question #:2 - (Exam Topic 3)

You need to ensure that Admin4 can use SSPR.

Which tool should you use, and which action should you perform? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Action:

Enable app registrations.
Enable password writeback.
able password hash synchronization
Disable password hash synchronization

Tool:

Azure AD Connect
Synchronization Rules Editor
Azure Active Directory admin center

Answer:

Action:

Enable app registrations.
Enable password writeback.
able password hash synchronization
Disable password hash synchronization

Tool:

Azure AD Connect
Synchronization Rules Editor
Azure Active Directory admin center

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

Action:

Enable app registrations.
Enable password writeback.
Enable password hash synchronization
Disable password hash synchronization

Tool:

Azure AD Connect
Synchronization Rules Editor
Azure Active Directory admin center

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-sspr-deployment>

Question #3 - (Exam Topic 3)

You need to configure the Office 365 service status notifications and limit access to the service and feature updates. The solution must meet the technical requirements.

What should you configure in the Microsoft 365 admin center? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To configure the notifications:

Briefing email
Help desk information
Organization information

To limit access:

Privileged Access
Release preferences
Office installation options

Answer:

To configure the notifications:

	▼
Briefing email	
Help desk information	
Organization information	

To limit access:

	▼
Privileged Access	
Release preferences	
Office installation options	

Explanation

Graphical user interface, text, table Description automatically generated

To configure the notifications:

	▼
Briefing email	
Help desk information	
Organization information	

To limit access:

	▼
Privileged Access	
Release preferences	
Office installation options

Topic 4, Misc. Questions

Question #:4 - (Exam Topic 4)

You have three devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	BitLocker Drive Encryption (BitLocker)	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group2, Group3
Device3	Windows 10	Disabled	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require BitLocker	Assigned
Policy1	Windows 10 and later	Require	Yes
Policy2	Windows 10 and later	Not configured	Yes
Policy3	Windows 10 and later	Require	No

The device compliance policies have the assignment shown in the following table.

Name	Assigned to
Policy1	Group3
Policy2	Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Device1 is compliant.	<input type="radio"/>	<input type="radio"/>
Device2 is compliant.	<input type="radio"/>	<input type="radio"/>
Device3 is compliant.	<input type="radio"/>	<input type="radio"/>

Answer:

Statements	Yes	No
Device1 is compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device2 is compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Statements	Yes	No
Device1 is compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device2 is compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device3 is compliant.	<input checked="" type="radio"/>	<input type="radio"/>

Device 1:

No because Device1 is in group3 which has Policy1 assigned which requires BitLocker.

Device 2:

No because Device2 is in group3 which has Policy1 assigned which requires BitLocker. Device2 is also in Group2 which has Policy2 assigned but the BitLocker requirement is not configured in Policy2.

Device3:

Yes because Device3 is in Group2 which has Policy2 assigned but the BitLocker requirement is not configured in Policy2.

Reference:

<https://blogs.technet.microsoft.com/cbernier/2017/07/11/windows-10-intune-windows-bitlocker-management-ye>

Question #:5 - [\(Exam Topic 4\)](#)

You have a Microsoft 365 subscription that contains a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. The tenant includes a user named User1

You enable Azure AD Identity Protection.

You need to ensure that User1 can review the list in Azure AD Identity Protection of users nagged for risk. The solution must use the principle of least privilege.

To which role should you add User1?

- A. Security reader
- B. Compliance administrator
- C. Reports reader
- D. Global administrator

Answer: A

Explanation

The risky sign-ins reports are available to users in the following roles:

- ➔ Security Administrator
- ➔ Global Administrator
- ➔ Security Reader

Of the three roles listed above, the Security Reader role has the least privilege.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/reports-monitoring/concept-risky-sign-ins>

Question #:6 - (Exam Topic 4)

You have a Microsoft 365 subscription.

You suspect that several Microsoft Office 365 applications or services were recently updated.

You need to identify which applications or services were recently updated.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From the Microsoft 365 admin center, review the Message center blade.
- B. From the Office 365 Admin mobile app, review the messages.
- C. From the Microsoft 365 admin center, review the Products blade.
- D. From the Microsoft 365 admin center, review the Service health blade.

Answer: A B

Explanation

The Message center in the Microsoft 365 admin center is where you would go to view a list of the features that were recently updated in the tenant. This is where Microsoft posts official messages with information including new and changed features, planned maintenance, or other important announcements.

The messages displayed in the Message center can also be viewed by using the Office 365 Admin mobile app.

Reference:

<https://docs.microsoft.com/en-us/office365/admin/manage/message-center?view=o365-worldwide>

<https://docs.microsoft.com/en-us/office365/admin/admin-overview/admin-mobile-app?view=o365-worldwide>

Topic 1, Contoso, Ltd

This is a case study. **Case studies are not timed separately. You can use as much exam time as you would like to complete each case.** However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The offices have the users and devices shown in the following table.

Office	Users	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an Active directory forest named contoso.com and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You recently configured the forest to sync to the Azure AD tenant.

You add and then verify adatum.com as an additional domain name.

All servers run Windows Server 2016.

All desktop computers and laptops run Windows 10 Enterprise and are joined to contoso.com.

All the mobile devices in the Montreal and Seattle offices run Android. All the mobile devices in the New York office run iOS.

Contoso has the users shown in the following table.

Name	Role
User1	<i>None</i>
User2	<i>None</i>
User3	Customer Lockbox access approver
User4	<i>None</i>

Contoso has the groups shown in the following table.

Name	Type	Membership rule
Group1	Assigned	<i>Not applicable</i>
Group 2	Dynamic	(user.department -eq "Finance")

Microsoft Office 365 licenses are assigned only to Group2.

The network also contains external users from a vendor company who have Microsoft accounts that use a suffix of @outlook.com.

Requirements

Planned Changes

Contoso plans to provide email addresses for all the users in the following domains:

- East.adatum.com
- Contoso.adatum.com
- Humongousinsurance.com

Technical Requirements

Contoso identifies the following technical requirements:

- All new users must be assigned Office 365 licenses automatically.
- The principle of least privilege must be used whenever possible.

Security Requirements

Contoso identifies the following security requirements:

- Vendors must be able to authenticate by using their Microsoft account when accessing Contoso resources.

- ➔ User2 must be able to view reports and schedule the email delivery of security and compliance reports.
- ➔ The members of Group1 must be required to answer a security question before changing their password.
- ➔ User3 must be able to manage Office 365 connectors.
- ➔ User4 must be able to reset User3 password.

Question #:7 - ([Exam Topic 1](#))

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to assign User2 the required roles to meet the security requirements.

Solution: From the Office 365 admin center, you assign User2 the Security Reader role.

From the Exchange admin center, you assign User2 the Help Desk role.

Does this meet the goal?

- A. Yes
- B. NO

Answer: B

Explanation

- ➔ User2 must be able to view reports and schedule the email delivery of security and compliance reports.

The Security Reader role can view reports but not schedule the email delivery of security and compliance reports.

The Help Desk role cannot schedule the email delivery of security and compliance reports.

Reference:

<https://docs.microsoft.com/en-us/exchange/permissions-exo/permissions-exo>

Question #:8 - ([Exam Topic 1](#))

You need to meet the security requirement for the vendors.

What should you do?

- A. From the Azure portal, add an identity provider.
- B. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify the –UserPrincipalName parameter.
- C. From the Azure portal, create guest accounts.
- D. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify the –UserType parameter.

Answer: C

Explanation

- ➡ Vendors must be able to authenticate by using their Microsoft account when accessing Contoso resources.

You can invite guest users to the directory, to a group, or to an application. After you invite a user through any of these methods, the invited user's account is added to Azure Active Directory (Azure AD), with a user type of Guest. The guest user must then redeem their invitation to access resources. An invitation of a user does not expire.

The invitation will include a link to create a Microsoft account. The user can then authenticate using their Microsoft account. In this question, the vendors already have Microsoft accounts so they can authenticate using them.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/b2b/add-users-administrator>

Question #:9 - (Exam Topic 1)

You need to meet the security requirement for Group1.

What should you do?

- A. Configure all users to sign in by using multi-factor authentication.
- B. Modify the properties of Group1.
- C. Assign Group1 a management role.
- D. Modify the Password reset properties of the Azure AD tenant.

Answer: D

Explanation

References:

➡ The members of Group1 must be required to answer a security question before changing their password.

If SSPR (Self Service Password Reset) is enabled, you must select at least one of the following options for the authentication methods. Sometimes you hear these options referred to as "gates."

Mobile app notification

Mobile app code

Email

Mobile phone

Office phone

Security questions

You can specify the required authentication methods in the Password reset properties of the Azure AD tenant. In this case, you should set the required authentication method to be 'Security questions'.

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-howitworks>

Topic 2, Fabrikam, Inc

This is a case study. **Case studies are not timed separately. You can use as much exam time as you would like to complete each case.** However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

Overview

Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide.

Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States.

Existing Environment

Active Directory Environment

The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication.

Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts.

All users authenticate to on-premises applications by signing in to their device by using a UPN format of *username@fabrikam.com*.

Fabrikam does **NOT** plan to implement identity federation.

Network Infrastructure

Each office has a high-speed connection to the Internet.

Each office contains two domain controllers. All domain controllers are configured as a DNS server.

The public zone for fabrikam.com is managed by an external DNS server.

All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed.

All shared company documents are stored on a Microsoft SharePoint Server farm.

Requirements

Planned Changes

Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription.

Fabrikam plans to implement two pilot projects:

- Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
- Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.

Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

Technical Requirements

Fabrikam identifies the following technical requirements:

- All users must be able to exchange email messages successfully during Project1 by using their current email address.
- Users must be able to authenticate to cloud services if Active Directory becomes unavailable.
- A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.
- Microsoft Office 365 ProPlus applications must be installed from a network share only.
- Disruptions to email address must be minimized.

Application Requirements

Fabrikam identifies the following application requirements:

- An on-premises web application named App1 must allow users to complete their expense reports online.

- ➔ The installation of feature updates for Office 365 ProPlus must be minimized.

Security Requirements

Fabrikam identifies the following security requirements:

- ➔ After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
- ➔ The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically.
- ➔ After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.
- ➔ The principle of least privilege must be used.

Question #:10 - (Exam Topic 2)

Which migration solution should you recommend for Project1?

- A. From Exchange Online PowerShell, run the New-MailboxImportRequest cmdlet.
- B. From Exchange Online PowerShell, run the New-MailboxExportRequest cmdlet.
- C. From the Microsoft 365 admin center, start a data migration and click Upload PSST as the data service.
- D. From the Exchange admin center, start a migration and select Remote move migration

Answer: D

Explanation

During Project1, some users will have mailboxes in Microsoft 365 and some users will have mailboxes in Exchange on-premises. To enable users be able to exchange email messages successfully during Project1 by using their current email address, we'll need to configure hybrid Exchange.

To migrate mailboxes in a hybrid Exchange configuration, you use Exchange admin center perform Remote move migrations.

Reference:

<https://docs.microsoft.com/en-us/exchange/hybrid-deployment/move-mailboxes>
